PROFESSIONAL SUMMARY

I'm a builder at heart and a founder by drive, a native of Edo State, Nigeria. Over the years I've written code, made sense of data, crafted interfaces people actually enjoy using, and designed visuals that stop the scroll, and it's shaped me into someone who sees the full picture of what great digital products look like.

As founder of Ridely, a dispatch logistics application, and Ownbase, a developer access and code management platform, I've gone beyond the keyboard into full product ownership identifying market gaps, building solutions from the ground up, and steering them through the messy, rewarding process of bringing ideas to life. That experience has made me a sharper developer, a more intentional designer, and a more decisive thinker. I also serve as an EdoTechWave Ambassador, contributing to tech accessibility across Nigeria.

My background is originally in molecular diagnostics and clinical biotechnology, and that scientific training in precision, hypothesis-driven thinking, and comfort with complex data still shapes how I approach engineering problems today.

Whether I'm deep in a codebase, shaping a product roadmap, or digging into a dataset, I bring the same things to the table: curiosity, rigor, craft, and a commitment to work that actually matters.

WORK EXPERIENCE

Ambassador — Edo Tech Wave, Edo Tech Wave 02/2025 – Present | Benin City

- Spearheaded social media campaigns that elevated the Edo Tech Wave brand across digital platforms, growing community visibility and engagement among tech enthusiasts in Edo State.
- Planned and coordinated community tech events, workshops, and meetups that fostered collaboration, learning, and networking among developers, designers, and innovators.
- Mentored junior community members, providing guidance on career development, technical skills, and navigating the tech industry.
- Actively recruited new talent into the community, expanding its membership base and contributing to a more vibrant, diverse tech ecosystem in Benin City.

Frontend Development Instructor | HTML · CSS · Bootstrap · JavaScript · React.js 06/2025 | Part-time

Luzoma Microsystems — Frontend Development Training

- Taught frontend web development to over 20 students, ranging from complete beginners to those transitioning into tech, covering HTML, CSS, Bootstrap, JavaScript, and React.js.

- Designed and delivered a structured curriculum that took students from foundational concepts through building real, portfolio-ready projects.
- Mentored students individually, breaking down complex concepts into practical, digestible lessons tailored to each learner's pace and background.
- Drove strong outcomes: 40% of students went on to freelance independently, with several landing full-time development roles—turning classroom learning into real economic opportunity.
- Reinforced best practices in responsive design, clean code structure, and version control (Git), preparing students for real-world development workflows.

Full Stack Developer | Founder | Node.js · TypeScript · React · Supabase 01/2026 – 06/2026 | remote

Ownbase — Developer Access & Code Management Platform

- Conceptualized and built Ownbase, giving non-technical business owners full visibility and control over their codebase, solving the risk of developers leaving with unchecked repo access.
- Built GitHub/GitLab repo linking, granular access management, and real-time activity monitoring (via Supabase) that translates commits, pushes, and PRs into plain-language insights.
- Integrated OpenAI to auto-summarize repositories in non-technical language, letting owners understand their codebase without a developer present.
- 24 repos connected, 11 users, and 4 early business owners onboarded.

Founder & Full Stack Developer | React Native · React · Node.js 09/2024 – Present | Benin City (Hybrid)

Ridely — Dispatch Logistics Application

- Founded and built Ridely end-to-end, a dispatch logistics platform connecting businesses with reliable riders for last-mile delivery — owning architecture, design, development, deployment, and go-to-market.
- Built a cross-platform mobile app (React Native, iOS/Android) with real-time rider tracking, a distance-based dynamic pricing engine, and dual dashboards for customers and riders.
- Currently piloting with 3 test riders and a growing waitlist of 30+ signups in Benin City; earned 1st Runner-Up at the Edo Tech Stars Hackathon for the platform's execution.

Data Analytics | React · Node.js · Chart.js 01/2025 – 04/2025 | Benin city

CryptoNow — Real-Time Crypto Price Tracker & Analytics Dashboard

- Built CryptoNow, a real-time crypto analytics dashboard aggregating live data from CoinMarketCap and Finnhub gives users a single, multi-source view of the market with live, always-current pricing (no manual refresh needed).
- Helped users make more informed decisions through interactive Chart.js visualizations of price history and trends, plus digestible market data (cap, volume, % change across timeframes).
- Let users quickly find and track what mattered to them via robust search/filtering and a watchlist system, cutting through the full market feed to focus on their preferred assets.

Full Stack Developer, Core Wealth Market — Crypto Trading Platform 03/2026 – 03/2026 | remote

- Designed and built a fully functional crypto trading platform enabling users to monitor markets, execute trades, and manage digital asset portfolios in real time.
- Built a secure, high-performance backend handling live market data, trade execution logic, and account management with reliability and speed under real-time load.

- Delivered a clean, intuitive interface that simplified complex financial data, helping users make smarter, more confident trading decisions; client-reported estimates cited an average 33% increase in trader earnings after adoption.

Full Stack Developer | Next.js · React · Node.js · MySQL 05/2026 – 06/2026 | remote
Nexus Gadgets — Full Stack E-Commerce Application

- Built BuyFirst Gadgets, a full-featured e-commerce platform for gadgets and electronics covering the full shopping experience from storefront to order fulfillment.
- Delivered a dynamic storefront (browsing, search, filtering), persistent cart, and streamlined checkout, helping shoppers find the right product faster and complete purchases with less friction, backed by secure authentication with session management and personalized user dashboards for tracking orders and managing accounts with ease.
- Engineered an admin dashboard for product/image management, user account monitoring, and order status tracking across the full fulfillment lifecycle, giving shoppers accurate, up-to-date visibility into where their orders stand.
- Built with Next.js (SSR, performance), Node.js (backend API), and MySQL (relational data), with a responsive, accessible UX across devices, ensuring a fast, reliable shopping experience whether on mobile or desktop.

Full Stack Developer | Personal Projects | Next.js · React · Node.js · MySQL · Chart.js · 01/2025 – 06/2026 | Remote
CoinMarketCap API · Finnhub API

- Built three self-directed full-stack applications to sharpen end-to-end development skills: **Nexus Gadgets** (e-commerce platform with dynamic storefront, cart/checkout, auth, and an admin dashboard for order and inventory management), **CryptoNow** (real-time crypto analytics dashboard aggregating CoinMarketCap and Finnhub data with live pricing, interactive charts, watchlists, and dark/light modes), and a **personal blog platform** (dynamic content management with a typography-focused, responsive design).
- Used **Next.js** and **React** for performant, server-rendered frontends, **Node.js/Express** for scalable backend APIs, and **MySQL** for relational data management.
- Delivered full ownership across each build—architecture, database design, frontend implementation, and deployment—demonstrating consistent full-stack capability across varied product types (e-commerce, fintech data, and content platforms).

EDUCATION & CERTIFICATIONS

B.Sc. in Microbiology, University of Benin 2020 – 2024 | Benin City, Nigeria

- Graduated with strong academic performance, developing a sharp analytical mindset and a disciplined, research-driven approach to problem-solving—skills that directly translate into building reliable, data-informed software solutions.
- Led a group research project to successful completion, receiving a high distinction for excellence—demonstrating leadership, collaboration, and the ability to deliver under pressure.
- Active member of the **Nigerian Society for Microbiology (NSM)**; attended the 45th Scientific Conference and Annual General Meeting (2023).

Industrial Training (SIWES), Centre for Forensic Programs and DNA Studies (CEFPADS)
Gained hands-on experience in structured data collection, technical documentation, and analytical research in a professional lab environment—building habits of precision and attention to detail that carry directly into software development and data analysis work.

TECHNICAL SKILLS

Frontend — Proficient
React.js, Next.js, React Native, HTML5, CSS3, JavaScript, TypeScript, Tailwind CSS

Backend — Proficient
Node.js, Express.js, MongoDB, MySQL, Supabase, Appwrite, Python

Web3 — Proficient
Solidity, Solana, Smart Contract Integration

Design & UI — Competent
Figma, Adobe XD, Canva, CorelDraw

Tools and DevOps — Proficient
Git, Docker, Postman, Vercel, Hostinger, Google Cloud Console, Framer Motion, Three.js, XAMPP

Payments & Integrations — Proficient
Paystack, CoinMarketCap API, Finnhub API, GitHub API, GitLab API, Open AI API

Data & Visualization — Proficient
Chart.js, Recharts

LANGUAGES

English
